POSITION OVERVIEW

Position title: Assistant Project Scientist

Salary range: Based on UCSB Project Scientist series salary table

Percent time: 100%

Anticipated start: January 3, 2023

Position duration: Initial appointment is for one year, full time with benefits with the intention to extend the appointment beyond this period based on performance and availability of funding.

APPLICATION WINDOW

Open date: September 30, 2022

Next review date: Monday, Oct 17, 2022 at 11:59pm (Pacific Time)

Apply by this date to ensure full consideration by the committee.

Final date: Friday, Dec 16, 2022 at 11:59pm (Pacific Time)

Applications will continue to be accepted until this date, but those received after the review date will only be considered if the position has not yet been filled.

POSITION DESCRIPTION

A position is available in the laboratory of Dr. Emily Jacobs to conduct research on the neural and cognitive responses to sex steroid hormones, including studies across the menstrual cycle, pregnancy, and menopausal transition, and in response to hormone-based medications. The applicant will oversee the collection and processing of neuropsychological, neuroimaging, and fluid biomarker data, and will perform data analysis and manuscript preparation. The appointee will be expected to make significant conceptual contributions to the project.

The University is especially interested in candidates who can contribute to the diversity and excellence of the academic community through research, teaching and service as appropriate to the position.
